DETAILED ACTION

Applicants' response, which included amendment to claims 2, 4-9 and cancellation of claims 1 and 3, filed on 12/7/2007, is made of record. Claims 2 and 4-9 are now pending. In view of cancellation of claims 1 and 3, all prior art rejections made in the previous office action have been rendered moot. The following new grounds of rejections are applied to claims 2 and 4.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Sakurai et al., JP 200340939. English Machine Translation provided as Part 1 and Part 2.

Sakurai et al., teaches the compound of claim, 2. See entire detailed description(Part 1). See example 8 and formula 12. Note trihydroxyethyl isocyanurate is reacted with maleimide caproic acid.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sakurai et al., JP2003 40939.

Teaching of Sakurai et al., as discussed in the above 102 rejection is incorporated herein. As noted above, Sakurai et al., teaches the compound of claim 2. Compound of claim 4 differs in having one hydroxyethyl group. Sakurai et al., teaches the reaction of maleimide-caproic acid with trishydroxyethylisocyanurate to make the trisubstituted compound of claim 2. Thus, one trained in the art would be motivated to make the disubstituted compound of claim 4 by using two equivalent of maleimide-caproic acid. See *In re KSR International vs. Teleflex Inc.*, 82 USPQ2d 13-85, 1397 (2007).

Allowable Subject Matter

Claims 5-9 are allowed.
